Plan sec the Connection file - Sheet Contains a record of the action taken in this respect - in 1908 - Plan in Flag E, from which it will be seen that the GSR of the Amalgam were sold and both GSR refining Parties, here & Party & the Indian Mints - As regards tailings &c, ~~the~~ ~~was~~ ~~asked~~ to ~~be left~~ separate proposals were called for

13 It is now for consideration how the articles under reference should be disposed of - Plan sec list 1 to 4 submitted by the Director List 1 refers to GSR & GSR Amalgam Cyanide GSR the total value of which amounts to 4236-11-4 List 2 relates to Quartz, Quartz sand & Mill sand - the total value of which is 4293-7-0. List 3 relates to Amalgam, & Mercury valued Rs 8k-4-3 List 4 relates to Miscellaneous articles most of which are not of much value

14 The articles in list No 1 may

NOTE—Contn. sheet.

Serial No.

to GSt refund to the Bombay Govt and the GSt will be the open market at Bombay. As regards claim No 2, it is doubtful if he shall be able to get the GSt extraction elsewhere than on the Kolar GSt Field. The size & weight of the articles also are against their being sent for in their present form. He may perhaps approach the Mining Board in the matter to get the GSt extracted the charges of extraction being of Course refund to them. Articles in list No 3 also may be treated similarly. The articles in list No 4 may be dealt with as recommended by the Director

15 In 1908, there was a feeling that it was desirable to entrust the work to the Mining Board. At that time the Mining Board were setting up a claim to all such GSt & Quartz - it was felt that the handing over of such property

NOTE—Contn. sheet.

Serial No.

to the Board would lead to applications. It was in this way that the refinement of gold on that occasion was entrusted to the Mint. The position at the present time is more favourable than in 1908, as due to the Chief Court's decision of 1913 the claim of the Mining Board to such gold has been recognized. Flag A.

16 It is after a consideration of all the circumstances that the present suggestion has been made of putting gold articles in list 1 treated at the Bombay Mint. As regards articles in list 2, the Mining Board may be consulted if they will do the work for us. If they refuse we shall have to consider the means of disposal.

There is no difficulty in getting the
gold and the gold precipitates refined
in Bangalore. There are local goldsmiths
able to do so and I can assist the
Department if necessary in
getting a reliable man. The work will
have to be done under proper supervision.
The addition to an Officer of the Subordinate
Service - either one of the Chemist of the Agl
Service employed in assaying work or one
of the Professors of Chemistry in the Central
College may be requested to supervise
the work. If it can be done before
the end of December I have no objection
if not I consider it necessary to
provide another Officer in the
service of the Govt Chemist being
employed in this connection. As
regards the Quartz and Sand

To

K. V. Anantaraman, Esquire, B.A.,
General Secretary to the Government of
His Highness the Maharaja of Mysore.
(In Charge)

22 AUG 1923

Sir,

In inviting kind reference to G.O.No. J.949-51/Cts.151-07-4, dated Bangalore, 24th September 1908, in compliance with which all the confiscated gold, with the exception of gold quartz &c., and mercury, that had accumulated in the custody of this Department upto that date, was refined and the refined gold disposed of by sale, I have the honour to state that there is in my custody a quantity of confiscated property which has been transferred from time to time to this Department from the year 1909 onwards to the year 1915, besides the gold quartz &c. referred to above.

2. As no confiscated property seems to have been received here since that time, I enquired of the Special Magistrate, Kolar Gold Fields, and the Chief Inspector of Mines, who have replied that all such property is now being handed over to the common nominee of the mines. Copies of their letters are enclosed for perusal.

3. The question of the disposal of this confiscated property, the custody of which is a source of anxiety to this office where there is no proper watch and ward, ought to have been taken up and dealt with

earlier. If this property had been disposed of about two years back when the price of gold was high, Government would have realized about 25 % more than its present value. As matters stand now, I consider it high time that the whole of the confiscated property in the custody of this Department, should be disposed of and its value realized at an early date.

4. Further, it is contemplated to dispose of by sale a small quantity of gold residue received from the Laboratory and which is the property of this Department.

5. Orders of Government are solicited about the disposal of these properties.

I have the honour to be,
Sir,
Your most obedient servant,

A. M. Sen

Offg. Director,
Mysore Geological Department.

C.M.

17

D. O. letter No.138, dated 7th August 1923, from the Special Magistrate, Kolar Gold Fields, to the Offg. Director, Mysore Geological Department.

In reply to your D.O.letter No.75, dated 12th July 1923, regarding the non-receipt of sponge gold or quartz for disposal in the Geological Department subsequent to 1916, I write to inform you that gold, gold quartz etc., are invariably returned after the disposal of a case to the persons found to be entitled to them and not confiscated to Government and as per decisions of the Chief Court in XVIII Mys.185 (July 1913), sponge gold, quartz etc., are given to the common nominee of the Mines if it is found that they belong to one of the working Mines, though it may not be possible to say which individual Company is entitled to them. This explains why there have been no cases of confiscations to Government.

Copy.

A. Anderson

Offg.Director,
Mysore Geological Department.

(18

D.O. Letter No.84, dated 18th July 1923, from the Chief Inspector of Mines in Mysore , to the Offg.Director, Mysore Geological Department.

With reference to your D.O.letter No.76, dated 13th July 1923, regarding the custody and disposal of gold, gold quartz etc., confiscated to Government by the Special Magistrate, Kolar Gold Field, I beg to inform you that no such property has ever been received in this office - either now or in the past - for safe-custody or disposal. But I understand that, by a ruling of the Chief Court of Mysore, all the gold, gold quartz, etc.,proved to the satisfaction of the local Court to belong to the Kolar Mines, the identity of which cannot be established by any single Mine, is at present being ordered by the Court to be handed over to the Common Nominee of all the Mines, viz., the Secretary of the Mining Board.

GENL. & REV. SECT.
Br
13 SEP. 1923
G. D. SECTION

Sir,

In compliance with your letter No.I.C.1183/Geol. 28-23-2, dated Bangalore, 5th September 1923, I have the honour to forward herewith three statements furnishing all the available information supplied to us by the Judicial Department regarding the confiscated materials which are now in the custody of this Department. The sealed packets of gold &c., are preserved in tact and the total quantity as per the above statement is 215$\frac{3}{8}$ tolas approximate, valued by the Court at Rs.4236-11-4. Regarding the quantity of quartz and sand, no definite information is available, as the same has not been supplied to this office. The several consignments of materials are all mixed up and the only possible way of finding out, at least the total quantity of each of these, is by actual weighment, which, in the absence of suitable weighing appliances or weighbridge in this office, cannot now be determined. For similar reasons, the total quantity of mercury also can only be determined by weighment. The total approximate values of quartz and sand and mercury are Rs.4293-7-0 and Rs.86-4-3 respectively.

2. In addition to the above there are also the items referred to in the enclosed list A, which had been

retained in this Department as typical samples for exhibition and other purposes or set aside as containing no gold or being of no value. I am of opinion that there seems to be no further use in retaining these materials, except No.2 in the list - a lump of sponge gold, which will be of use for exhibition purposes. If approved, items 1, 9, 12 and 13 will be disposed of with the other confiscated property under advertance; items 6 and 8, will be remitted to the Treasury under "Law and Justice", items 3, 7 and 11 will be discarded and items 4,5 and 10 will be disfigured and disposed of for whatever value they may fetch in the market.

3. Of the confiscated property on hand, the gold portion can be conveniently refined and the refined product disposed of in the market to the best advantage; but the disposal of the other materials, especially quartz and sand, does not appear to be so easy and presents some difficulties. To extract all the gold out of the quartz and sand under advertance, there are no suitable appliances anywhere in the Province except on the Kolar Gold Field. Sending it elsewhere, incurring heavy packing and transport &c. charges is out of question. Under the circumstances we have to approach the Mining Board, Kolar Gold Field, with a request to do this work for us. It is doubtful, whatever the total value appraised by the Court may be, if full value can be realized after paying all charges of transport, extraction &c. If Government approve, I beg to submit that the common nominee of the Kolar Gold Field Mines would be approached through the Chief Inspector of Mines, Ooregum, regarding the purchase of these materials as it is desirable that they should not get abroad into private hands, and to quote his price for the whole lot.

4. The total quantity of gold precipitates received from the Laboratory is tolas 95 approximate, which may be

valued

(2)

valued at about Rs.2,000/-

I have the honour to be.
Sir
Your most obedient servant.

Offg.Director,
Mysore Geological Department.

To

The Offg Director of Geology

Sir,

With reference to correspondence ~~ending~~ with your kind no 446 & 12-9-23, regarding the disposal of Sponge gold ~~quartz~~ etc now in the custody of the Govt, I am directed to enquire whether it is possible to get Sponge gold, amalgam etc required in your dept so that it may be disposed of by auction or otherwise after such refinement. The favour of a very early reply in this matter is requested.

(44

No. 582 & 2 encls one dealing with 9 papers.

Dated, Bangalore, 4th October 1923.

Geol 28-23-4

From A. M. Sen, Esq., M.Sc., F.G.S., &c.,
~~B. JAYA RAM, Esquire, F.C.S.,~~
Offg. *Director, Mysore Geological Department.*

To

T. E. Jeyaram Iyer, Esq., B.A., B.L.,
Revenue Secretary to the Government of
His Highness the Maharaja of Mysore,
BANGALORE.

Sir,

In reply to your letter No.I.C. 1678/Geol. 28-23-4 dated Bangalore 29th September 1923, I have the honour to state that on enquiry at the Chemical Laboratory of the Agriculture Department, I am given to understand that it possesses facilities only for conducting assays for gold, and it is not in a position to undertake the work of refining gold on any scale owing to lack of necessary equipment &c., It was owing to similar difficulties that in 1908, when confiscated gold that had accumulated in the custody of this Department up to that time was dealt with and disposed of, the State Geologist and Secretary to Government, Geological Department, had it refined by professional private agency under his direct supervision in this office premises. If Government approve, I think it is quite possible to have the confiscated gold and amalgam refined in this department on lines similar to those that have been previously adopted (see flag A in the file), The file containing papers relating to the subject is herewith submitted for perusal and kind return.

As regards the extraction of gold from confiscated quartz and sand, the subject of the disposal of which is under consideration of Government, I beg to submit that the process is a highly technical and elaborate one, as

P.T.O

(45

practised on the Kolar Gold Fields. In the absence of proper equipment and suitable skilled labour it is not advisable to attempt it here in the Department, as it is sure to result in considerable waste and loss to Government. In the matter of the disposal of these materials, kind reference is invited to my suggestion in para 3 of this office letter No.444 dated 12th September 1923.

I have the honour to be,

Sir,

Your most obedient servant,

A. M. Sen

Offg. Director,

Mysore Geological Department.

Read-

Correspondence ending with letter No. 582 dated 4th October 1923 from the offg. Director, Department of Geology, requesting orders of Government regarding the disposal of certain confiscated properties consisting of gold, quartz and sand and mercury that are now in the custody of the Department.

- - -

Order No. J. C. 3768-70/Geol. 28-23-6

Dated 14-12-23.

The Director, Department of Geology, reports that the confiscated properties referred to above were transferred from time to time from the Judicial Department to the Geological Department from the year 1909 onwards to the year 1915. They comprise of (1) gold amounting to 215 3/8 tolas approximate, valued by the Judicial Department at Rs.4,236-11-4 and (2) gold quartz and sand approximately valued at Rs.4,293-7-0 and (3) mercury valued at Rs.86-4

2. Government are pleased to direct that the gold now in the custody of the Department may be refined and disposed of in the market to the best advantage to Government. Similarly the quantity of about 95 tolas of gold precipitate reported to be in the Department valued at Rs.2,000 may be disposed of and the proceeds credited to Government.

3. As regards the quartz and sand, the Director reports that there are no suitable

48

appliances to extract gold out of them. Government are pleased to direct that these materials be sent to the Chief Inspector of Mines in Mysore for being further dealt with with the help of the Common Nominee of Kolar Gold Mines, the charges of extraction, transport etc. being met out of the sale proceeds of the refined metal finally disposed of.

4 With regard to mercury and the properties shown in statement A, they may be disposed of as proposed by the Director and the proceeds credited to Government. The sponge gold weighing 8 tolas shown as item 2 in list A may be retained in the Department for exhibition purposes.

21.9.25

5. Do ... action taken in accordance with ... above ... value realised ... to ... as in ... for ... year.

Secretary to Govt., Genl. Deptt.

The Director, Department of Geology,
The Comptroller to Govt.
The Chief Inspector of Mines in Mysore.

Offg. Director, Mysore Geological Department.

To

K. V. Anantaraman, Esquire, B.A.,
Offg.Secretary to the Government of His Highness
the Maharaja of Mysore.
Revenue Department.

Sir,

In reply to your letter No.Geol.5234/28-23, dated Bangalore 1st March 1924, enquiring when the report called for in para 5 of the G.O. referred to therein may be expected to be submitted to Government I have the honour to state that the gold portion of the material under advertance has all been refined, and the refined material notified for sale in the Government Gazette. A copy of the Notice is appended hereto for the information of Government. After the conclusion of the sale and the realization of the amount a report relating to this part of the subject will be submitted in due course.

2. As regards the disposal of quartz etc. materials, the matter is under correspondence between the Chief Inspector of Mines and the Secretary, Kolar Gold Field Mining Board, and is receiving their best attention. The materials have since been despatched to the Superintendent, Nundydroog Mines, as requested by the Chief Inspector of Mines.

I have the honour to be,
Sir,

Offg. Director, Mysore Geological Department.

28-23.

GEN. & REV. SECT. 29 APR. 1924 G. D. F.

K. V. Anantaraman, Esquire, B.A.,
Offg. Secretary to the Government of His Highness
the Maharaja of Mysore,
Revenue Department.

SIR,

In continuation of this office letter No.1586, dated 21st March 1924, and in compliance with para 5 of the G.O. No.I.C.3768-70/ Geol.28-23-6, dated Bangalore, 14th December 1923, I have the honour to submit a report on the results of refining the confiscated gold and the gold residues and the disposal by sale of the refined products including the gold precipitates.

2. The total quantity of material belonging to the Judicial Department was 228.25 tolas, which on being treated yielded 176.73 tolas of refined gold for sale. Similarly 76.46 tolas of gold residues belonging to the Geological Department, yielded 64.89 tolas of refined gold for sale. The precipitated gold was merely melted and cast into a bar which weighed 111.97 tolas.

3. The sale of these gold bars was duly advertised in the Mysore Gazette and copies of the sale Notification were distributed among the gold merchants here and in Mysore. Six tenders were received for the purchase of these bars. Of these only three were worth considering. By the time the tenders reached me in camp, these three merchants cancelled their tenders owing to the unsteady and fickle condition of the gold market and the consequent drop in the price of gold. On my arrival at head quarters I made enquiries, and asked the merchants to make fresh offers. There was only one merchant who came forward with the proposal to purchase the gold bars on the basis of a rate to be fixed at five annas less than the

Bombay

Bombay market price per tola of 100 touch. This offer was reasonable enough and considering that the market price of gold was still above the normal, the gold bars have been disposed of to the best asvantage at prices set forth in the enclosed statement. The total amounts realised were Rs.4364-13-6 and Rs.4455-13-6 being the sale proceeds of gold belonging to the Judicial Department and the Geological Department respectively. The former amount after deducting the refining charges &c. aggregating Rs.144-8-0 has been credited to the State Huzur Treasury on 24th April 1924 under the head Deposit to be adjusted later on, and the latter amount has been credited to the Treasury on the same date under the departmental receipt head.

4. The treatment of gold quartz and sand sent to the Kolar Gold Field has not been completed as yet; and a separate report will be submitted to Government on receipt of the results obtained and the disposal of gold &c.

5. In this connection, I wish to bring to the notice of Government that this Department had been charged with the custody of the confiscated gold &c. belonging to the Judicial Department since the year 1897; and as well as to the disposal of these properties. In the year 1908-09, all the confiscated gold that had accumulated in the department up to that date was refined and disposed of under orders of Government, realizing Rs.22261-13-6. Now all the confiscated gold which had accumulated in this office since that time has been dealt with and disposed of realizing Rs.4364-13-6. Realizations from the disposal of gold quartz, sand &c., and confiscated mercury are yet to be added. On the former occasion, the Government ordered the whole amount of the net sale proceeds to be transferred to the Judicial Department, thus the Geological Department got nothing for all its trouble and responsibility. This Department having been commissioned with the task of the custody and disposal of the property of another Department, it seems but right that it should be remunerated for the work it does. I take this opportunity of representing the claims of

this

this Department to half the share of the receipts now derived from the sale of the confiscated gold and **these** to be derived from the disposal of quartz, sand &c., and solicit that Government will be pleased to give the matter due consideration and pass favourable orders thereon.

I have the honour to be,
Sir,
Your most obedient servant,

Offg. Director,
Mysore Geological Department.
